1.6 Literature Survey

In technology, rate play important
role. Wide variety of research papers are available in this area of and
..... As part of literature survey, many IEEE papers and journals are referred
(mention any other references). Few of the papers referred are briefly discussed in this
section.

1.7 Motivation and Problem Definition

From the literature survey, it is observed thatexplain what is the possibility of work you can take up.....

- **Problem Definition**

In this project work,write what you want to do.....
.....

1.8 Objectives fulfilled

- Objective 1is conducted.
- Objective 1is verified.
-andare compared.

Explain on what platform or using what tools test are conducted.....

1.9 Scope and limitations

Discuss limitations.....-

- Limitation 1.
- Limitation 2.

1.10 Organization of the report

The project report is organized as mentioned below-

Chapter 1: Chapter 1 gives Literature survey is discussed. Objectives and scope for the project work are defined.

Chapter 2: This Chapter presents the methodology for Seps for verification system are explained.

Chapter 3: In chapter 3, results obtained are presented. Results for different are explained and discussed.

Chapter 4: In this chapter, conclusion is given on the for Scope for future work is given.

In the end, a reasonable bibliography is given for the readers help.

In Appendix 1,are given.

METHODOLOGY

In chapter 1, ...brief the previous chapter and mention the need for this chapter.

Chapter 3

Concepts/System Explanation/..

In chapter 2, ...brief the previous chapter and mention the need for this chapter.

The concepts/system working/component are explained in this chapter.

- **Summary**

In this chapter, is explained. Explanation explanation explanation
explanation explanation explanation explanation

Chapter 4**RESULTS AND DISCUSSION**

In this chapter, results observed with the using are discussed. In section 4.1, are presented. In section 4.2, results with presented. In section 4.3, comparison of effect of is presented. In section 4.4, effect of is presented.

4.1 Test scenario 1

Explanation of test scenario 1as given in Table 4.1

Table 4.1:

4.1.1 Specifications for test 1 in 4.1

Fig. 4.1

Discussion

4.1.2 Specifications for test 2 in 4.1

Contd. To next sections and sub sections.....

4.3 Comparison of

Explanation

- **Summary**

Verification of 2x1 space time coding communication system is performed, based on Alamouti transmit diversity scheme. Turbo code is used as channel code also called as error correcting code. P_e vs SNR plots demonstrate that SNR requirement depends on channel attenuation. Also, as per the expectation, Turbo code improves the P_e performance at lower SNR.

Chapter 5

CONCLUSION AND FUTURE SCOPE

Verification of was successfully carried out and results were demonstrated on dd-mm-yyyy. XYZ[®] was used as platform to verify the
.....was demonstrated. Conclusion of the results is presented in section 5.1.

5.1 Conclusion

With verification offollowing points are observed.

- i. Observation 1.
- ii. Observation 2, as in 4.1.1 to
- iii. Observation 3, as in Fig 4.11 (a).
- iv. Observation 4.

5.2 Scope for future work

Different possibilities of taking up future work are mentioned as below-

- Mention of work 1.
- Mention of work 2.
- Mention of work 3.
